

# Infant Choking: Conscious

---

- Hold the infant facedown straddling your forearm.
- Give 5 back slaps between the shoulder blades.
- Turn the infant onto their back by supporting the head.
- Give 5 chest compressions.
- Repeat until...
  - The object comes out or the infant goes unconscious.

# Infant Choking: Unconscious

---

- Lay the infant on a hard flat surface.
- Tap the foot and see if they respond.
- Look at the chest for 5 – 10 seconds.
- Start CPR and continue for 5 cycles, then call 911.
- Continue until someone takes over for you.
- There are no blind finger sweeps.
